Theology and Religion / Environmental Studies
Internship opportunity at MKE water & education tech startup:

Collaborate directly with a startup CEO and Head of Curriculum -- see your work published immediately and used by teachers and students around the country!

**When:** Fall and Spring internships available. Expected Time Commitment: 10-20 hours/week.

STEMhero is a growing, award winning, education technology startup that began at Marquette and is now used by students around the world. Our unique software and curriculum takes on the world's energy and water challenges by empowering middle schools students to run experiments using data from their own lives.

We are deeply networked into Milwaukee's booming water technology and STEM education sectors.

**Your role:** We are growing, especially in Catholic schools. You will lead an effort to integrate Pope Francis' Laudato Si' encyclical into the STEMhero curriculum. In additional you will take a leadership role in further expanding a new national consortium of Catholic school sustainability professionals.

We'd love to hear about your interests, your skills, and your story.

**Flexible work location:** Work from where you want and/or Marquette's Kohler Center for Entrepreneurship (707 Building)
